Yukon Legislative Assembly
P.O. Box 2703
Whitehorse, Yukon Y1A 2C6

To the Yukon Legislative Assembly:

I have attached for submission an additional 140 signatures, to be added to Petition No. 5 - Re mandatory COVID-19 vaccinations.

Sincerely,

Patti McLeod
MLA Watson Lake

To the Yukon Legislative Assembly:

This petition of the undersigned shows:

THAT the Yukon is a geographically and socially isolated jurisdiction, where in previous times of need its citizens have historically relied upon, and ultimately succeeded by, supporting one another;

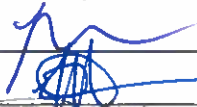

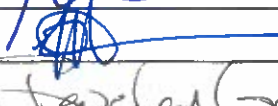

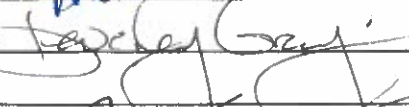

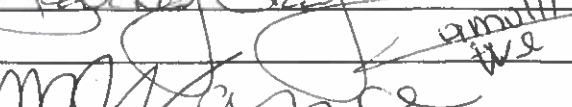

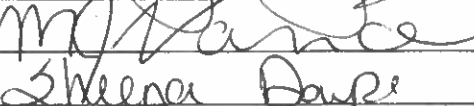

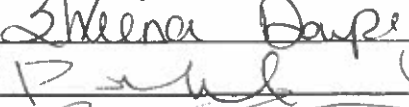

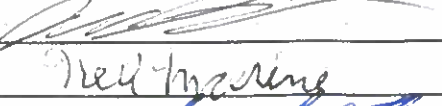

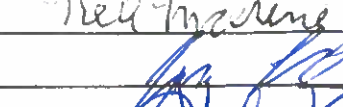

THAT the COVID-19 pandemic has exacerbated a pre-existing crisis of skilled staff-shortages in a number of crucial public sectors, including healthcare and education, and any government policy that further decreases operating capacity and thereby negatively affects essential program delivery to Yukoners would be unconscionable, particularly given the current circumstances;

THAT many of the territory's vital private sector industries, such as tourism and hospitality, are barely surviving, struggling to remain economically viable due to previous and continuing pandemic-related restrictions, and cannot sustain greater burdens brought about by government edict that impede efforts related to recruitment and retention of staff, limit access to customers, or require providing additional capacity to implement discriminatory hiring or service policies;

THAT a shadow pandemic, one of mental health, is concurrently devastating our Yukon communities, isolating our citizens and aggravating our territory's efforts to overcome our many challenges, including housing and addictions, and government-mandated measures that threaten Yukoners' ability to financially provide for themselves and their families, or pursue healthy social interactions and recreational activities, will only serve to further contribute to this crisis;

THAT the concept of a two-tiered society, the discrimination and exclusion of people based on their confidential healthcare information and their natural rights to informed consent, medical choice, bodily-autonomy or religious/ethical/moral freedoms, and the use of coercion to usurp these rights, is inconsistent with a free, inclusive society or a democratic government;

THEREFORE, the undersigned ask the Yukon Legislative Assembly to urge the Yukon government to immediately rescind any and all requirements for mandatory COVID-19 vaccination, announced October 15 2021 and currently proposed to be implemented November 30 2021.
