Dear Special Committee on Electoral Reform,

I would like to recommend a Yukon Citizen's Assembly be created to study how Electoral Reform will help improve our voting system in the Yukon.

I support the statement in the Fair Vote Yukon Chair made in the it's presentation to the Special Committee on Earth Day 2022 :

"I just think that it is really important that we change. A citizens' assembly of elders and youth working together at the hard work that it is to create a just society — I am speaking truth to power right now. We need a just society for us to be able to continue together at peace. This is what a citizens' assembly would do. It will tap into all of that knowledge that sits right here with us and will help us and lead us into a better way forward."

Yours sincerely,
Sue Greetham
