To Whom It May Concern,

I understand that your committee is accepting input regarding Human Rights in the Yukon. As an educator of the next generation I feel the need for more Human Rights education in our schools is great. Many schools have social justice clubs, however, only a small proportion of the student body take part. Thus Human Rights education needs to be deepened and standardized in our curriculum, both elementary and secondary.

I would be more than happy to discuss this need in more detail. Please feel free to contact me.

Have a great day!
