

Petition – Concerns on the Tagish River Habitat Protection Area

To the Yukon Legislative Assembly and the Tagish River HPA Committee:

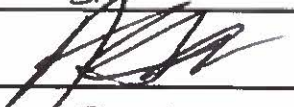

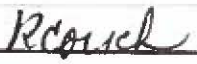

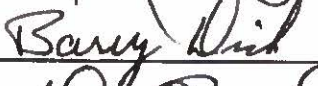

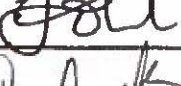

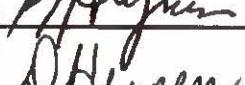

This petition of the undersigned below shows:

THAT residents/owners of properties along the Tagish River are asking to be consulted with in the decisions made for the Tagish River long term plan including the 2020 HPA as this is our past, present and future existence and lifestyle and are keen to protect this location with the exception of the two recommendations below.

THAT Recommendation #21 minimize disturbance on shorelines to have consideration for those who have properties with water access. Setting realistic guidelines to ensure the safe movement of wildlife is obtained, while also allowing for enjoyment and use of space for residents.

THAT Recommendation #22 reducing docks is not supported by residents along the river. Residents support each lot to have a dock, while creating permits and requirements to provide uniform, safe installment and upkeep to preserve the banks and the habitat.
