

To the Yukon Legislative Assembly;

This petition of the undersigned shows:

**THAT** residents and owners of properties along the Tagish River are asking to be reflected in the decisions made for the Tagish River Habitat Protection Area draft recommendations as this is our past, present and future existence and lifestyle and we are keen to protect this location along with the Tagish River Habitat Protection Area Steering Committee;

**THAT** Recommendation Number 21 to minimize disturbance on shorelines should have consideration for those who have properties with water access, and;

**THAT** Recommendation Number 22 should be revised to support one dock per lot and the availability of permits for residents;

**THEREFORE**, the undersigned ask the Yukon Legislative Assembly to urge the Government of Yukon to ensure that realistic guidelines are created for shoreline use by residents so that water access is available, including each Tagish River lot being able to obtain a permit for a dock.
